

International Conference on problems and trends of contemporary geometry

CURRENT GEOMETRY

**Hotel Oriente, Via Luigi Serio 10, 80069 Vico Equense, Naples (Italy).
June 24 - 26, 2008.**

Under the auspices of

Associazione "Diffiety School" (Santo Stefano del Sole (AV), Italy);

Dipartimento di Matematica e Applicazioni "R. Caccioppoli" (Naples University "Federico II", Italy);

Dipartimento di Matematica ed Informatica (Salerno University, Italy);

Istituto Italiano per gli Studi Filosofici (Naples, Italy).

Scientific Committee

G. Marmo (Naples, Italy),

A. Shelekhov (Tver', Russia),

A. Vinogradov (Salerno, Italy).

The power of synthesis of Geometry, which led in the past to the formulation of "grand unification theories", has got an essential role nowadays, especially because of the growing fragmentation of knowledge due to scientific progress. In order to avoid too a big dispersion, geometers need a constant dialogue. Therefore, a stable experience of personal meetings, apart from telematic interchanges, cannot be renounced. Current Geometry was born to allow a periodic update about actual progresses in Geometry (and its applications) on the international scene.

Organizing Committee

M. Bächtold (Zürich), A. De Paris (Naples), C. Di Pietro (Salerno),
G. Moreno (Naples), G. Sparano (Salerno), L. Vitagliano (Salerno).
